Summary

Computer Science graduate and Quality Assurance professional with experience in software testing, API validation, and data verification. Seeking to leverage a strong foundational background in programming, statistics, and system design to pursue an MSc in Artificial Intelligence, with a specific focus on intelligent software ecosystems and machine learning applications.

Education

St. Lawrence College, Tribhuvan University	Kathmandu, Nepal
Bachelor of Science in Computer Science and Information Technology (BSc CSIT)	Apr. 2021 – Sep. 2025
- Final Grade: 71.83% - Core Coursework: Artificial Intelligence, Statistics & Probability, Linear Algebra, Data Structures & Algorithms (DSA), Database Management Systems (DBMS), Software Engineering	

Professional Experience

Bidhee Pvt. Ltd.	Kathmandu, Nepal
Quality Assurance Analyst	Mar. 2026 – Present
- Perform manual testing of complex web applications, including functional, regression, integration, and exploratory testing phases. - Conduct detailed API testing utilizing Postman and Insomnia to validate request/response payloads, status codes, and ensure strict endpoint reliability. - Document, track, and manage software anomalies in issue trackers with detailed reproduction steps, severity classifications, and expected vs. actual behavior metrics.	
Bajra Technologies	Kathmandu, Nepal
Quality Assurance Trainee	Mar. 2025 – Sep. 2025
- Validated Apache Superset business intelligence dashboard outputs and verified underlying database accuracy utilizing PostgreSQL. - Designed, mapped, and executed comprehensive test cases for specialized web-based data pipelines and analytics platforms. - Engineered foundational end to end automated UI regression tests using Cypress to maintain platform consistency. - Utilized Postman for cross system data consistency testing to prevent structural mismatches across integrated environments.	

Projects

Hostel Rental Management System MERN Stack GitHub	Jan. 2025
- Developed a full stack web application implementing robust role based access control (RBAC) authentication for administrators, owners, and students. - Architected clean MongoDB database schemas and secure REST APIs to process core transactional property booking workflows. - Maintained system reliability and verified backend logic via rigorous system debugging, integration testing, and edge-case verification.	
YouTube Clone Platform React, REST APIs GitHub Live Demo	Aug. 2024
- Integrated third party REST web services to achieve dynamic multimedia content processing, retrieval, and live video search functionalities. - Designed and implemented a modular, highly responsive interface utilizing reusable component driven UI architectures.	

Technical Skills

Languages: JavaScript, TypeScript, SQL, Python, HTML/CSS
 Data & Testing: Basic Data Analysis (Pandas, NumPy), LLM Evaluation (Deepeval), PostgreSQL, MongoDB, Cypress, Postman
 Tools & Platforms: Google Colab, Git/GitHub, Docker, Linux (Ubuntu), VS Code
 Methodologies: SDLC, STLC, Bug Lifecycle Tracking, Systematic Data Validation Management

Leadership & Community Involvement

Lions Club of Kathmandu	Kathmandu, Nepal
Charter Member	2023 – Present
- Coordinated blood donation initiatives and community health camp operations. - Mobilized emergency disaster relief strategies and physical supply distributions during regional flooding incidents. - Organized local environmental sanitation drives and community level sustainability awareness programs.
